Project Title: Green Bay Packers Website

I'd like this site to have multiple pages, with links along the side or top. There is definitely plenty of content in Wikipedia to create a website with multiple pages.

1. **Home Page and Team News –** Welcome to the website and list big news items from the year
2. **Buy Tickets –** Link to the actual ticket site
3. **Current Roster –** Current Roster of players
4. **Schedule**
5. **Images from the year –** A page of photos of fans and players
6. **History of the franchise –** Include a list of records that Packers own, and division, conference, and super bowl titles
7. **Prominent Packers of the Past –** Include HoFs, Packers HoFs, Retired Numbers, Probowlers, All-Pros, and Coaches (and any records they own)
8. **Sources –** this page will just list sources, including the Wikipedia page, as well as other sources for photography, and any other credits that need to be provided.
